PROFILE

To Whom it May Concern,

Thank you for receiving this information about our organization. MMTI , founded in 2006, develops health care technologies, systems and educational programs using innovative, sustainable and scalable methodologies while simultaneously incorporating and melding with local customs and cultures. Enclosed please find an overview of MMTI. We look forward to collaborating with you.

Sincerely,

Founder Naureen A. Shaikh MD, FAAFP, swMBA
Executive Director Robert Moynihan MD swMBA
Mobile Medical Team International 501c3

About MMTI

Mobile Medical Team is dedicated to providing sustainable and scalable systems, technologies, environments, health care and education to people without access in both in the United States and abroad.

Mobile Medical Team:

- Evaluates health care needs of a given community

- Troubleshoots potential obstacles impeding health care delivery

- Formulates and implements plans for meeting those needs

- Establishes health care education programs

- Builds self-sustaining technologies and health care solutions with strong infrastructures based on native staffing and indigenous practices.

Mobile Medical Team develops health care programs and centers and education programs using innovative and proven methodologies while simultaneously incorporating and melding with local customs and cultures.

MMTI has a legislative Board of Directors, an Advisory Board, Central Administration and Committees for its programs with expertise ranging the US Government, DARPA, World Bank, WHO, UN, US Department of State, CDC, Foundation CEO's, and Field Specialists spanning North America, Europe, Africa, Asia and South America. All members of our administration, boards and committees volunteer their expertise and time to our projects which we believe are leading innovations for tackling our world's current and future challenges.

Current Programs Mobile Medical Team is currently engaged in the following projects both locally and internationally:

USA Domestic

Program Bay Area is a local project that provides insurance covered or pro-bono, no fee health care to underserved members of the community who lack access to affordable care. Home visits and care for elderly, vaccination clinics for local children and their families, and health care for un- or under-insured community members facing illness are just some examples of services in Project Bay Area.

Blossom was a supportive, therapeutic childcare program for families coping with difficult situations. Blossom was designed to provide a nurturing environment for children and families dealing with illness, abuse, injury or death of a parent or sibling, difficult separation or divorce, emotional injury, or other traumatic situation. Blossom partnered with county and Golden Gate Regional Center to offer free services for the participating children. This expertise has been applied to making our residential programs for abused women and children and refugee / foster care.

Vulnerable women and children residential program with partnership with AskNisa.org, GileadHouse.org and collaboration with Center for Domestic Peace applies our MMTI medical, emotional, lifestyle and therapeutic art and athletics services to offer stable and career support residential homes for low-income or homeless single mothers and children. Resident mothers and their children each pay a reduced rate of \$500 a month for residential care and these services. Residents also benefit from state MediCaid, Calfresh (food) and Calworks (cash aid and services) to eligible families.

Foster and Refugee residential care is being launched for individuals from birth up to 21 years with a goal of reunification with birth parents or independence at the age of 21. Health (medical, mental health and preventative health), music, art and fitness services as well as trans-cultural and language education and career support by experienced educators. They also benefit from state MediCaid, Calfresh (food) and Calworks (cash aid and services) to eligible families. In cooperation with <https://tlc4kids.org/> and <https://www.rescue.org/united-states/oakland-ca#>.

Hospice assisted residential care for disabled low or no-income women. A warm loving home – style environment with onsite Medicare covered hospice, healthy meals, medical, neurology, physical therapy, acupuncture, stress and mood management, as well as therapeutic art music and fitness services. The reduced cost of \$800 a month is covered by social security benefits.

International

21st Century Life Model incorporates the above projects into a comprehensive and sustainable community. Mobile Medical Team is building a 21st century Net Zero (financially, waste, power, agriculture) health campuses and cooperative communities. Bridging indigenous history, culture and lifestyles with selective modern tools, we build a healthier version of life and society. As a cooperative, services are distributed amongst residents: there are no fees for

services.

Digital Tools

Diffusion produced a series of health education video and audio segments on various topics in the areas of malnutrition, infectious disease, and family planning, that can be used classrooms around the world. The segments will be produced taking the needs and cultural climates of the various communities into consideration and will be distributed through schools using technology that is easily available in resource poor areas of the world. Through partnership with Facebook's Internet.org, Diffusion scaled to over 75 countries. This was free for all users in Internet.org.

Thin Chart / My Type Unique identifiers authenticated, patient-controlled health research platform and education portal with data wallet . In partnership with Global Offsite Care we offer a platform for global grand rounds and sharing of knowledge and approaches across a global healthcare community that encompasses all aspects of prevention, health, disease and ages and stages of life. There is no fees for users.

Prism.live is a financial transparency and organization coordination tool in partnership with Intuit, bringing transparency, stratification and coordination to humanitarian aid donations globally; providing donors and recipient organizations with real-time data on flow of funds and the efficiency of their use. There is no fees for users.
