MMTI , founded in 2006, develops health care technologies, systems and educational programs using innovative, sustainable and scalable methodologies while simultaneously incorporating and melding with local customs and cultures. Enclosed please find an overview of MMTI. We look forward to collaborating with you.

Sincerely,

Founder Naureen A. Shaikh MD, FAAFP, swMBA
Executive Director Robert Moynihan MD swMBA
Mobile Medical Team International 501c3

About MMTI

Mobile Medical Team is dedicated to providing sustainable and scalable systems, technologies, environments, health care and education to people without access in both in the United States and abroad.

Mobile Medical Team:

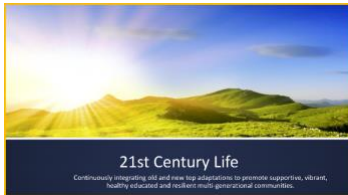

- Evaluates health care needs of a given community
- Troubleshoots potential obstacles impeding health care delivery
- Formulates and implements plans for meeting those needs
- Establishes health care education programs
- Builds self-sustaining technologies and health care solutions with strong infrastructures based on native staffing and indigenous practices.

Mobile Medical Team develops health care programs and centers and education programs using innovative and proven methodologies while simultaneously incorporating and melding with local customs and cultures.

MMTI has a legislative Board of Directors, an Advisory Board, Central Administration and Committees for its programs with expertise ranging the US Government, DARPA, World Bank, WHO, UN, US Department of State, CDC, Foundation CEO's, and Field Specialists spanning North America, Europe, Africa, Asia and South America. All members of our administration, boards and committees volunteer their expertise and time to our projects which we believe are leading innovations for tackling our world's current and future challenges.

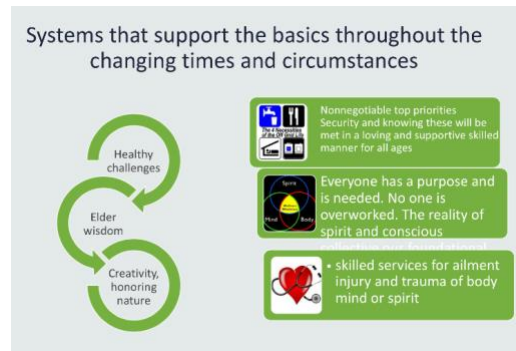

Current Support Requests for \$5M USD Mobile Medical Team is currently seeking support for the following programs designed to be self sustainable for 100 years:

21st Century Life

21st Century Life Model leverages MMTI's 20 years of practice across 70 countries of running cradle to grave health education and disaster response and disaster resilience programs and infrastructure development ranging from healthcare, water purification, agriculture, forestry, renewable energy and sustainable design and sovereign identity information

technology innovations and wallets. projects into a comprehensive and sustainable community. Mobile Medical Team is building 21st century Net Zero (financially, waste, power, agriculture) health campuses and cooperative communities. Bridging indigenous history, culture and lifestyles with selective modern tools, we build a healthier version of life and society. As a cooperative, services are distributed amongst residents: there are no fees for cooperative community inhabitants. Visitors pay weekly to monthly rates that vary by site and their local financial environments. Programs for childcare, disabled, or elderly day programs are by prepaid drop in Fee For Service (FFS) or by public sector contracts. Rehabilitation services for digital or substance addiction are by public or private insurance contracts or FFS. Continuing education, skill workshops and training programs are FFS or external scholarship based.

Multigenerational self sustaining cooperative farming and trade communities.

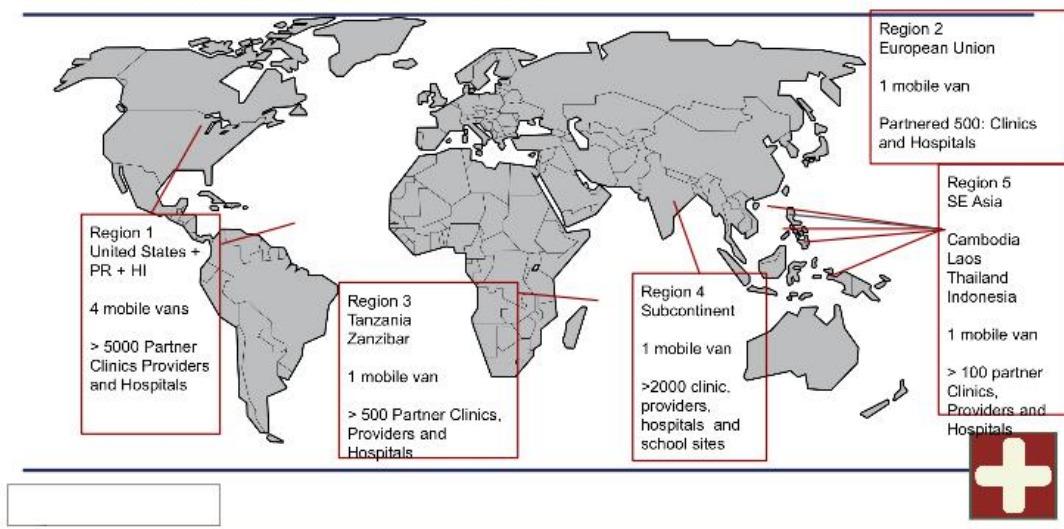

Providing a nurturing environment for children and families dealing with illness, abuse, injury or death of a parent or sibling, difficult separation or divorce, emotional injury, or other traumatic situation. MMTI leverages is programs of Blossom Therapeutic birth to 6yo state licensed and awarded school, partnered with county and Golden

Gate Regional Center to offer free services for the participating children, and MMTI's residential programs for abused women and children and 360 housing, caregiving, food and spirit care for hospice patients. **Hospice assisted residential care for disabled low or no-income women.** A warm loving home – style environment with onsite Medicare covered hospice, healthy meals, medical, neurology, physical therapy, acupuncture, stress and mood management, as well as therapeutic art music and fitness services.

Mobile Medical Vans providing insurance covered or pro-bono, no fee health care to underserved members of the community who lack access to affordable care. Home visits and care for elderly, vaccination clinics for local children and their families, addiction rehab and trauma therapy. Leveraging 20 years of disaster response to fire, flood, earthquake, war and pandemic affected populations.

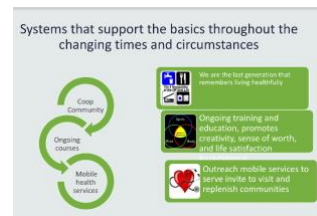

Beta Launch Q4 2025- 5 Regions

Accredited certification degree programs for 21st Century Living.

Technology will never replace regenerative vegetables, conscious collective, or love of human touch when someone is born into or transitions out of this world. We must maintain the wisdom of certain trades, including medicine, history, mathematics, metal, glass, and other trade skills. Medical students went from 30 years ago taking four years of gross anatomy, and a few months of pharmacology to the current state of a few months of anatomy and four years of pharmacology. The medical schools of the west are corporate funded as are the regulatory bodies in healthcare.. It is not only prudent but critical to create training programs whose graduates are certified and adept in full spectrum, family medicine, tropical medicine, environmental health, and medicine and animal husbandry as well as sustainability. Our trainees will rotate through our cooperatives of different cultures, languages and locations across the globe.
